

Develop your teams' skills with Robotics Academy

Robotics | Experts in Man and Machine

ROBOTICS

Baptiste Ligot, Global Service Leader

“From classroom with hands-on experience to digital learning with comprehensive material, your training experience at Stäubli is designed to bring you maximum utility and performance.”

STÄUBLI ROBOTICS

Committed to upskill you on your Stäubli Robots!

Our training offer is evolving to answer continuously your needs and take full advantage of your Stäubli robots!

Whether they work closely or not with Stäubli robots, develop your team members' mastery through training programs at Stäubli Academy. We've created profile-based training paths to meet each of your needs:

- Secure safe operations
- Ensure and optimize your robot integration
- Optimize your production
- Minimize breakdown time and lengthen your robots' useful life

Wherever your teams are in the world, they will have the same training experience. Standards are consistent across all our training centers.

And beyond the robots themselves, the objective for you is that your teams have the skills to constantly enhance your safety and operational capabilities.

Our training programs focus on upskilling through real-life applications. We also update them regularly to match your changing requirements – and robots.

STÄUBLI ACADEMY

Strengthen your teams' Skills

Experienced trainers at your Service

- Trainers from the field with over 10 years of experience in robotics and Stäubli
- Strong product technical skills (links with R&D) and pedagogical skills for optimal knowledge transfer

Small classes for good practice

- Trainee numbers are limited so your team members fully benefit from each session
- Each trainee gets robot practice
- Each trainee receives comprehensive training material after each course
- State-of-the-art facilities and equipment

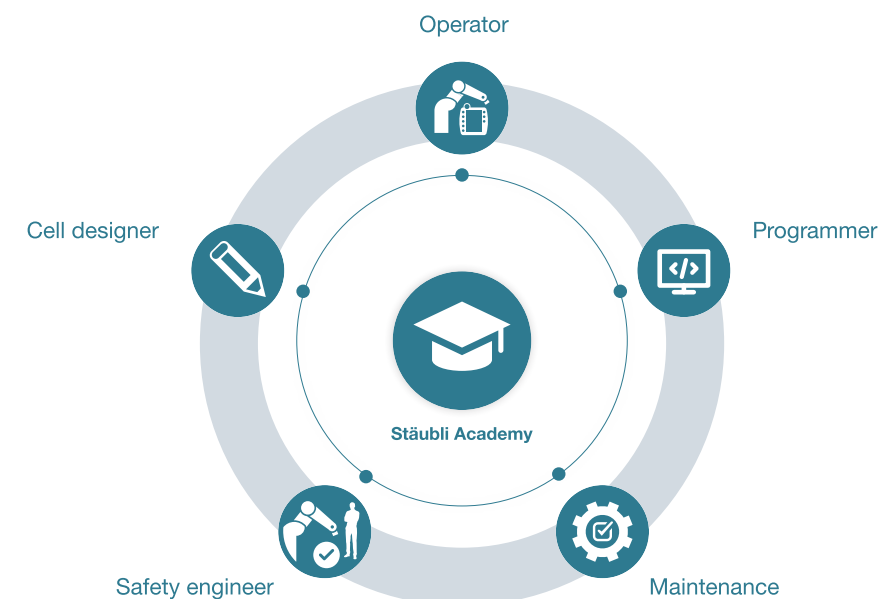

For all profiles & levels

- Choose your training path: operator, programmer, maintenance technician, mechanical or safety engineer
- A Training solution at each step for you and your Stäubli robot!

SUITABLE TRAINING

Learning path for your different team members

Develop your teams' skills on Stäubli products to always ensure safe and efficient operations. From manual arm movement to application programming and robot maintenance, your teams gain in proficiency.

OUR OFFER

Which training path matches your profile ?

Build your teams’ confidence and expertise when using Stäubli robots. Your training optimizes your investment further by helping you get the most out of your installation.

You can take courses tailored to your profile, covering the CS8C and CS9 product generations:

- For CS8-C products, courses are delivered in face-to-face and mostly in a stand-alone mode. Contact your local training center for more information on CS8-C training courses.
- For CS9 products, Stäubli recommends you follow the learning paths proposed below

The recommended learning paths below are only applicable to CS9 products.

Benefit from the same global offer wherever in the world! Our Class-room courses are available within our training centers or at customer site on demand (depending upon country).

	Operator	Programmer	Maintenance engineer	Safety engineer	Cell designer <small>(Stäubli Robotics Suite 2022)</small>
CS9 basic course (*)	✓ classroom	1 ✓ classroom	1 ✓ classroom		
Stäubli Robotics Suite programming environment		2 ✓ digital			
Troubleshooting & maintenance			2 ✓ classroom		
VAL3 programming		3 ✓ classroom			
Stäubli Robotics Suite safety basics				1 ✓ digital	
Safety course				2 ✓ classroom	
Stäubli Robotics Suite 2022 cell design					1 ✓ digital
Stäubli Robotics Suite 2022 simulation					2 ✓ digital

* Prerequisite course to attend programming, troubleshooting and maintenance courses.

-  Classroom courses
(held in our training centers)
-  Digital courses
(on our digital platform)
