

CARPET TECHNOLOGIES

A selection of carpets that can be woven with the ALPHA 500 UNIVERSAL.
For the complete weave structure catalogue, please contact our sales team.

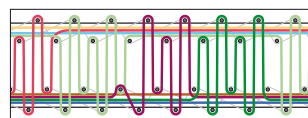

EXTRA

Two-turn weave structure for high productivity.
No mixed contours at colour changes.

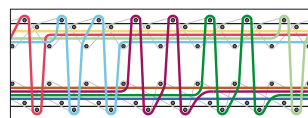

STRUCTURE

Carpet with various effects like double pile, triple pile, patterning of the ground weave or patterning in the carpet back. Different weft patterning can be achieved with the weft selector or optional Multi Weft Selector (e.g. Magic Weft Effect).

SINGLE

In this weave structure a pile knop is formed over every weft thread, producing a weave structure with a very high pile row density.

CLASSIC

Three-turn weave structure for high-quality carpets; very clear carpet back and higher knop pull-out strength. No mixed contours.
